## EDUCATION

**Fırat University**  
Faculty of Technology

01/2016 – Present

Elazığ/Türkiye

## WORK EXPERIENCE

**Full Stack Developer INTERN**

**Hamurlabs**

08/2020–09/2020

*Hamurlabs is a software company specialized on high performance and scalable cloud based software solutions. We are creating custom web and mobile app solutions for E-Commerce, Logistics, Retail, Banking companies.*

### Achievements/Tasks

- I studied on MVT architecture
- I experienced in developing full stack web applications
- You can find the details of the project on the youtube link below.

<https://github.com/ymlihaa/Rscool>

### Youtube

<https://www.youtube.com/watch?v=Jzyy4f7KaEM>

**Front End Developer INTERN**

**SmartMessage**

10/2019–11/2019

*SmartMessage is the omni-channel marketing and customer experience platform that helps leading brands confidently scale communications over millions of customers in real-time.*

### Achievements/Task

- During the internship, I implemented a time management system for the employees. I used React for the front end and ExpressJs framework for the back end. I wrote the Rest API to get the data in the database. I used Ant Design for the front end and wrote inline CSS to give style. In order to use some functions, lodash, moment etc. via NPM. included in my project.

**Front End Developer INTERN**

**NETAS**

02/2021 – Present

*Turkey to set up the first private domestic telecom R & D, as a continuation of our vision to perform the initial software exports today is just artificial intelligence in not abroad, at home, big data, cyber security, the internet of objects, VoIP, cloud computing, multi-media, such advanced GSM-R We conduct research and development projects on technologies, and export our technologies and know-how from the USA to Central Asia.*

## SKILLS

Web Development

React

HTML

NodeJS

Restful

Django

SQL

ExpressJS

Teamwork

ES6+

Vanilla JS

Aaile

CSS

Firebase

## PERSONAL PROJECTS

**Remote Exam (11/2020 – Present)**

- It is aimed that students can take trial exams remotely and analyze these exams without coming together and without the need for teachers to collect optics.
- <https://github.com/ymlihaa/remote-exam>

**Remote Exam API (11/2020 – Present)**

- Remote Exam system backend.
- <https://github.com/ymlihaa/remote-exam-api>

## ORGANIZATIONS

**Digital Signature System**

- I took the front end team leadership in the online attendance system project, which will be an alternative to my university's signed attendance system.

You can access the codes of the project here:
